TO WHOM IT MAY CONCERN

This is to give my special gratitude to write a letter of reference to **Mr. Nathanim Tadele**, who has completed the B.Sc degree in Computer Science from university of Gondar in the year 2023. I know him for the past four years as an undergraduate student and offered courses him **Fundamentals of Computer Programming, Advanced Programming, Computer Graphics and Compiler Design**. Moreover, I was his adviser for his final year project course.

During this period, I have found him to be a hardworking, cooperative and have strong communication skills. He is well mannered with professional approach, good conduct and character. His talent and knowledge in analytical and mathematical abilities for solving real world problems is exceptional.

While wishing him all the best in all future endeavors, I wholeheartedly recommend **Nathanim Tadele** without any reservations that he can discharge his responsibilities in an excellent manner and can be an asset for the organization to which he belongs. I am available at the address below for any inquiries.

Sincerely yours,

Ketret Zewdu, Lecturer
