**TO WHOM IT MAY CONCERN**

It gives me great pleasure to write this letter of recommendation for Mr. Nathanim Tadele Yeworew whom I know for his outstanding performance as a student of computer science at the University of Gondar. I have known Nathanim since September 2019 and taught him the courses **Research Methods for Computer Science**, and **Introduction to Data Mining and Warehousing** during his studies. As the result of the courses show, Nathanim was one of the distinguished students of the class. His analytical and mathematical abilities are quite impressive. I have had the opportunity to get to know Nathanim better since becoming department head in March 2021. He demonstrated project management skills on Final year projects, namely **Industrial Project I** and **Industrial Project II**.

Nathanim has shown himself to be smart, painstaking, meticulously responsible, and enthusiastic about his career. Besides, he is highly devoted to discharge any assignment, ready to learn and share what he knows, closely related to his instructors and classmates, punctual, and matured. He has an excellent command of both written as well as spoken English.

In closing, I can unreservedly recommend that Mr. Nathanim Tadele Yeworew be the most capable candidate to join your institution in any aspect that may be of concern to him. He is well determined and has ample potential to undertake any career in any position that his profession may require. I wish him every success in his career, and I am available at the address below for any inquiries.

With regards,

Shumet Tadesse, Lecturer

Head, Department of Computer Science
